

KILZ RESTORATION®

Oil & Shellac Performance in a Water-Based Interior Primer

Why should I choose KILZ RESTORATION®? Advancements in technology have led to water-based primers performing closer to oil-based primers in adhesion, stain blocking, odor blocking and even faster dry time which saves time and money.

Benefits of using KILZ RESTORATION vs. oil-based primer

- ✓ Non-combustible and non-flammable
- ✓ Lower odor and VOCs compared to oil and shellac making it ideal for use in interior spaces
- ✓ Easy soap and water clean-up vs. oil-based primers which require mineral spirits or paint thinners
- ✓ Quick Dry – ready to paint in 1 hour

Typical Uses

- Ideal for interior drywall, wood, plaster, masonry, brick, painted metal, ceramic tile, glass, glossy surfaces and more
- Blocks severe stains and helps prevent them from leaching through to the topcoat
- Seals fire, smoke, cigarette and pet odors
- Subfloor odor blocker when replacing carpet or wood flooring
- Dries hard and sands easily
- Can be top-coated with water-base or oil-base paint

GREENGUARD® Gold certification confirms the certified products are low VOC and minimize impact on indoor air pollution levels.
